## JungleJungle

1989 - 1999 samplepack

This pack is made up of samples taken from tracks in our record collection. It started as a bit of fun to kill time in between proper music work and suddenly became quite large, so it seemed a shame not to share it.

These are not some secret special sounds only available to 'jungle legends'. Anyone with the tracks and some time to waste could have made this pack.

- Size - 390mb
- Contents - 650+ breaks, basses, pads, riffs, hits, vocals & FX
- Format - All samples taken from vinyl or CD and saved as 16bit WAVs.
- No mp3s were involved at any point in the process.
- All samples are cropped & normalized.
- The earliest sample in the pack is from 1989 and the latest is from 1999.
- This pack was created for fun and is not to be sold.

If you want to share the sample pack, point people at [www.blumarten.com/junglejungle](http://www.blumarten.com/junglejungle) for a direct download.

If you're not already familiar with how drum & bass came into being, we encourage you to go back in time and explore the history. There's some amazing music waiting for you there.
